2021-2023 ENERGY LAW NETWORK MEMBER SURVEY SUGGESTED TOPICS

- Intermediate to advanced panel on transmission planning. The current slow build out
 of transmission in the US is a huge impediment to the transition from fossil fuel
 generation to renewable energy + battery storage. It also worsens electric grid
 reliability. A comparison of how grid operators (ISO, RTO, utility, etc.) are addressing
 these issues in the US and abroad would be useful
- ESG for small/mid-size companies
- Green energy technology
- Renewable Energy
- Energy Services
- Electricity
- Gas
- Oil
- Regulatory Updates
- Alternative Energy Innovation
