# VIRTUAL CYBERSECURITY SUMMIT

The ACC Foundation's Cybersecurity Summit offers three days of educational sessions and networking opportunities, designed to engage and educate professionals. Sharpen your skills and knowledge while tackling today's most pressing cybersecurity concerns. Cybersecurity touches every aspect of consumer and corporate culture, and vulnerabilities present grave financial, legal, and reputational risks. Preventing, preparing for, and responding to data breaches in real time are chief concerns in today's workforce. We will keep you apprised of the latest threats and innovations through plenary sessions, expert panels, and the opportunity to network with peers. These learning opportunities will complement your broad understanding of cybersecurity strategies and principles, enabling you to become a more well-rounded, focused, and effective practitioner. This conference is geared towards law firms, corporations, and government officials.
