

The impact of Covid-19 on Cyber Security

Presentation by Control Risks

James Owen – Partner, Cyber, EMEA

William Brown – Director, Cyber, Middle East

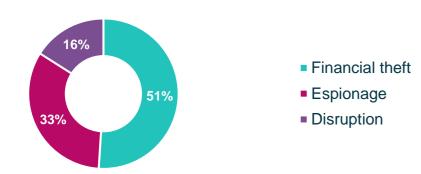

BY IN-HOUSE COUNSEL

FOR IN-HOUSE COUNSEL

20

Cyber attacks exploiting the pandemic

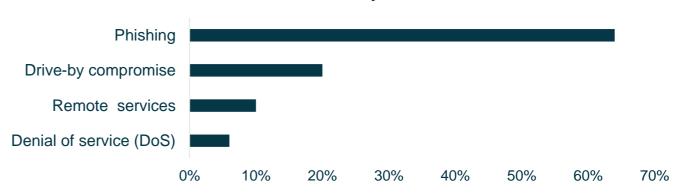

Count of organized operations since January

Share of attack vector of organized operations since January

Count of new domain registrations containing COVID-19 term since January

► Managing risk at a distance — our remote working reality

CAPACITY

Lack of bandwidth
Service provider issues
Device/license inventory
Help desk overload

DIFFICULTY

Less visibility
Variation and exceptions
Manual processes
Response and remediation

VOLATILITY

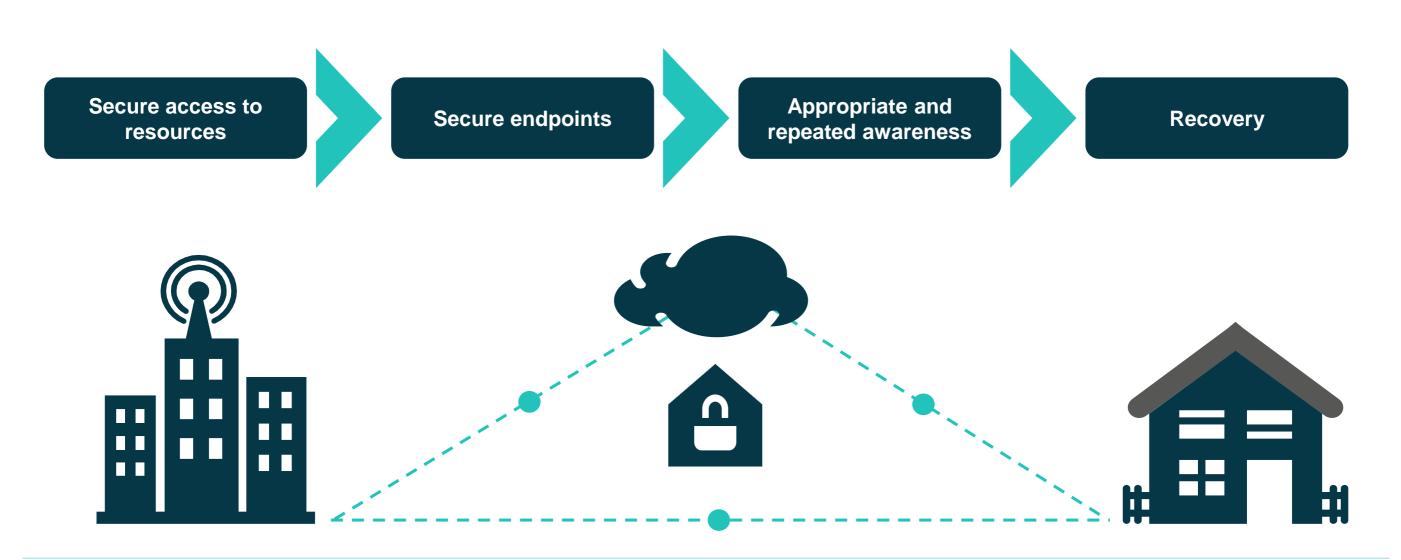

The human factor
Work/life blur
Insider activity
BCP viability

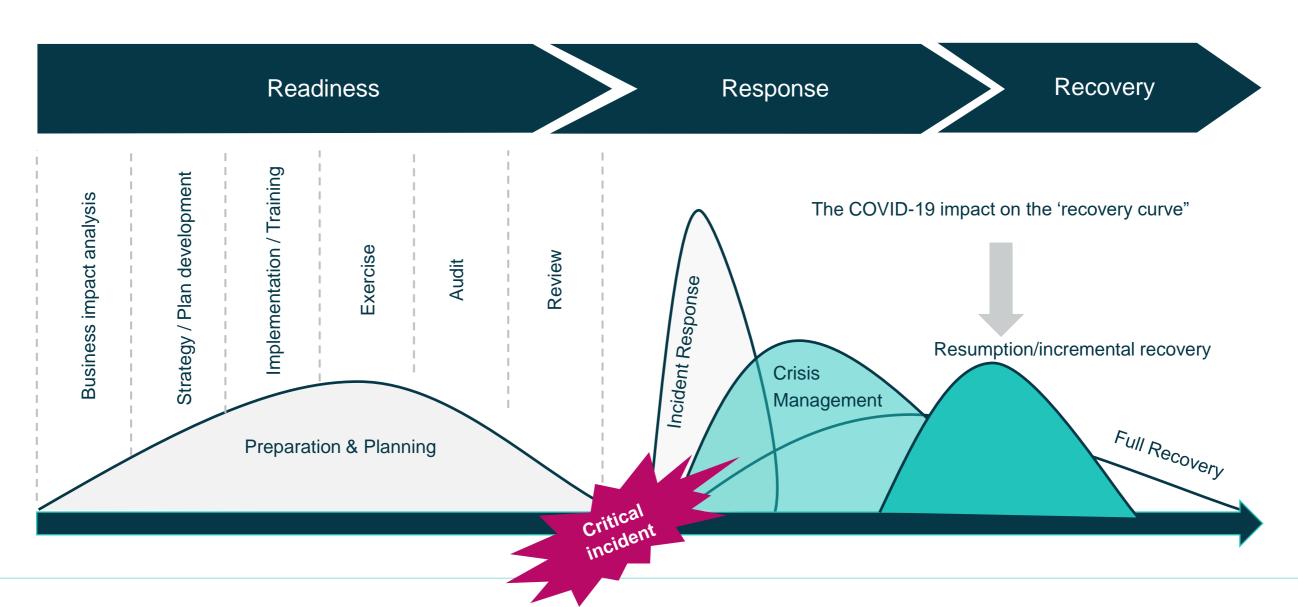

Significant regional variation: LatAm – Africa – North America – Europe – Asia – Middle East

Ensuring security and resilience when working from home

Managing cyber incidents in a time of Covid

The recovery process

The recovery team follows a process to answer critical questions and implement solutions to get you back to growth

Objectives

What kind of a company do we want to be, post-COVID-19 crisis?

External

How will the market and players be different, and where will the growth opportunities be?

Internal

What do we need to change internally in order to be able to execute on the identified opportunities

Risks

What are our threats and vulnerabilities in the post-COVID world?

How can we mitigate risks in order to have the best chances of capturing growth opportunities?

Accelerated implementation of changes to your business will be required to capture opportunity

Planning for business resumption and the eventual recovery

Assess the readiness and security of devices and infrastructure Review incident, crisis management and business resilience plan reviews Supply chain vulnerability assessments Embedding information security control reviews Insider risk assessments Data privacy and security exposure assessments
